AnzioWin Version 11.4n alt-M for HELP NUM
```

General rules of thumb:

- Functions 1-100 are designated for the character based system.
- Functions 101 and above are Millennium module functions.
- If there a function listed for Millennium that has a corresponding character based function a person must be authorized for both in order to use the function in a Millennium module.
- If a function needs password control and there is not a corresponding function or authorization listed contact the Help Desk.

Function hierarchy (inherited rights):

The ability to perform some functions are included with higher level functions.

Example: 121 View Item Records
 122 Create Item Records
 124 Update Item Records
 125 Delete Item Records

Staff authorized for #121 can only view item records. Staff authorized for #123 can automatically view (121) and create (122) item records without specifically being authorized for those functions.

Other examples: 101-105 (bib records); 111-115 (authority records); 131-135 (order records); 141-145 (check-in records); 161-165 (patron records); 211-215, 221-225, 231-235, (ERM records); 274-277 (templates); 411-415 (vendor records); 601-604 (Mil Media records);
